The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 and 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slocum (U.S. Patent 6,446,560) in view of Jenkins (U.S. Patent 6,755,136).

Slocum shows in Figure 5 a rail 203 of the claimed cross section. Not disclosed is a single cavity but rather two cavities divided by septum 203c. However taught by Jenkins is a rail 11 for a carriage which has a single cavity. To form the rail of Slocum without the septum 203c would have been obvious to one of ordinary skill in the art in view of the teaching of Jenkins as it might make the extrusion process of Slocum easier and less costly. The removal of the septum would not constitute an inventive step to one of ordinary skill in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
